We believe that skilled services are important to overall health and well-being.

Physical Therapy (PT)

While most people know their Physical Therapist can help them with pain management, there are numerous other facets to physical therapy. In addition to pain relief, physical therapy can help improve mobility, balance, overall functional ability, reduce the use of pain-relieving prescription drugs, help patients avoid surgery and it can also help patients live healthier, more physically-able lives. From posture, balance, fitness, and injury prevention the positive implications of physical therapy are vast.

Skilled Nursing (RN)

In-home Skilled Nursing (RN) is an essential part of healing, monitoring, and caring for those who need medical attention. Under the direction of the patients doctor, in-home health care services allows patients to remain in the comfort of their home why they receive the medical attention, and care, they need to recover and heal.

Our Inspiration

As a result of his injury, he became paralyzed from the neck down and dependent on a ventilator to breathe. Our family became strong and Danny became the nucleus of our family and we all took care of him and each other. In August of 2009, Danny passed away, but his legacy lives on through Danny's Home Health Care, Inc.

"At Danny's Home Health, our commitment is to achieve the highest clinical outcomes possible while delivering world-class customer service. We are committed to improving, and inspiring your quality of life, health, and happiness."

- Ziad S. Kassab, Founder/CEO

Occupational Therapy (OT)

Occupational Therapy is provided in the patient's home rather than at a physician's office or medical facility where utilizing the living environments of the home. Occupational Therapy can allow patients to become more independent in their everyday life, and routines. Our skilled Occupational Therapists develop patient care plans, assist in recover, and help individuals sustain meaningful day-to-day activities.

Speech Therapy (ST)

There are many benefits of Speech Therapy. It helps individuals with communication difficulties, improve their skills so that they are able to communicate more effectively. Our Speech therapists begins with an evaluation to assess patient difficulties for any structural issues that contribute to speech, language, feeding, or swallowing problems. People with certain medical conditions may also benefit from speech therapy.

Medical Social Worker (MSW)

Danny's Home Health Medical Social Workers help patients and their families cope with illnesses. They help patients understand their illness or condition and provide them with information about the resources available to them to cope with the emotional, financial, and social needs that arise with a diagnoses. As an advocate for the patient, our social workers ensure that patients' emotional and personal struggles are met through their medical

Home Health Aide (HHA)

Danny's Home Health Aides provide comfort, compassion and help to administers health support to people that are sick, elderly, or have disabilities that prevent them from taking care of themselves, and daily life tasks. These services are also in the patient's home.
